

The ninth MCI group Project client meeting will be held in Meeting Room 5.55, Ingkarni Wardli, at 3 pm on Thursday 15 May 2025.

Agenda

Chair: Jianing Dang

Secretary: Manhong Chen

1 Apologies

None.

2 Presentation

The discussion is about the outcomes and performance of four recommendation system models and how to write the testing plan.

2.1 Functional requirements and Presentations in Last Meeting

We presented the output of two recommendation models last week, including lightGCN and two towel models and discuss about what we should improved in our milestone 1 report.

2.2 Problems and solutions

After we trained and tested the LightGCN model, we found the performance of it was not enough good, so we show this problem to our supervisor. Finally, we confirmed that the model was not suitable for our project, so we should try other models to get the better performance.

3 Requirements Elicitation

In this meeting, we will show the outcomes of four recommendation system models we trained and tested for our supervisor, and hope our supervisor can give some suggestions to how to improve their performance. We will show the accuracy, recall and match score for each model with 3 different training and testing sets, including 70% and 30%, 80% and 20%, 90% and 10% respectively.

4 Other Issues

Questions for the testing plan.

Note: The next meeting will be held on week 10, in Meeting Room 5.56, Ingkarni Wardli, at 4 pm on Friday 23 May 2025.
